

**ORDER NO. 124**

**HAYS TRINITY GROUNDWATER §  
CONSERVATION DISTRICT §**

**AGREED ORDER**  
**Residential Closed-loop Geothermal Well Installation**

At its May 22, 2006, board meeting, the Hays Trinity Groundwater Conservation District (the District) Board of Directors, considered the proposal from Mr. Walter L. Krudop (Owner/Applicant) for the installation of four closed loop geothermal wells, each to a depth of 250 feet, to serve the future residence located at 5900 McGregor, Dripping Springs, TX. Mr. Krudop and the District stipulate as follows:

1. Before initiating any construction under this Agreed Order, the Applicant will register the project with the District. At the time of registration, the Applicant will remit payment of \$60.00 per well for a total of \$240.00.
2. The wells will be sealed over their entire length. All sealing materials must meet Texas Department of Licensing and Regulation standards for sealing materials.
3. Heat exchange fluid must be potable water.
4. Upon completion, the installer (i.e., a licensed well driller) shall submit to the District one log per each of the four wells, illustrating well construction.
5. This Agreed Order serves in lieu of an Operating Permit. The wells will be exempt from aquifer test requirement, and spacing will be as detailed in the Well Registration form.

**SIGNED AND ENTERED THIS \_\_\_\_ DAY OF May, 2006.**
