

**Hays Trinity Groundwater Conservation District
Resolution 2006-6**

- **Whereas**, drought and groundwater pumping are presently causing well failures and diminished spring flows in the district, &
- **Whereas**, the available ground water resource is insufficient to meet present and projected ground water demand.

Therefore, the Board of the Hays Trinity Groundwater Conservation District supports the importation into the District of groundwater or surface water consistent with the HTGCD Groundwater Management Plan and the Regional Water Quality Protection Plan for the Barton Springs Segment of the Edwards Aquifer and its Contributing Zone.

PASSED AND APPROVED on this 13th day of October, 2006.

Andrew H. Backus, Board President
